Art. 30 (1)(a) Information on parameters used in the applied reference price methodology related to the technical characteristics of the transmission system

Capacity prognosis for calendar year 2019

	Entry	Exit
Weighted capacity [kW/a]	17,015,604	32,046,488

Underlying assumptions:

- The capacity model is based on the already booked capacities of 2019.
- For the prognosis of bookings with a duration less than one year, the calendar year 2017 was mainly considered.
- Already ordered internal bookings of 2018 were taken into account.
- An overall reduction of 10 percent per year for production entries was assessed.
- The ruling regarding the regulation of BEATE is taken into account.
